

Open urban data

- OSM streets & PT
- building footprints
- service locations

UrbanGraph
GeoDataFrame-native

- node & edge tables
- geometry, time, length
- lazy cached matrix

Algorithms

- **IduEdu** routing
multi/nearest-source,
OD, cutoff
- **ObjectNat**
- **custom** models

Travel-time outputs

- OD & nearest-source
- isochrones
- coverage zones

Indicators & maps

- accessibility gain
 - coverage, criticality
- ⇒ *planning interpretation*

scenario edits: edit tables → rebuild → re-screen
